EDUCATION

Georgia State University, Andrew Young School of Policy Studies
Ph.D. *Economics* — Expected 2027
M.A. *Economics* — 2024

Dissertation: Essays on Health and Development Economics
Committee: James H. Marton (Chair), Lauren Hoehn-Velasco, Angela B. Snyder, David Wu

University of Ibadan
M.Sc. *Economics* — 2018

University of Jos
B.Sc. *Economics* — 2012

ACADEMIC APPOINTMENTS

Federal University Wukari
Associate Lecturer, Department of Economics — 2020–2022
Assistant Lecturer, Department of Economics — 2018–2020
Graduate Assistant, Department of Economics — 2015–2018

AFFILIATION(S)

Center for the Economic Analysis of Risk (CEAR), Georgia State University
Research Scholar [Link] — 2025–2026

Center for Econometrics & Applied Research (CEAR), University of Ibadan
Visiting Research Assistant — 2018–2019

FIELDS

Health Economics, Public Economics, Applied Microeconomics

WORKING PAPERS

"Exploring the Differential Impact of Repealing the ACA Individual Mandate Tax Penalty by Health Status". *Job Market Paper.* [Link]

Abstract: A health insurance mandate can mitigate adverse selection, but its distributional consequences depend on who exits when enforcement ends. I study the 2019 elimination of the ACA individual mandate penalty, exploiting cross-state variation in mandate enforcement by comparing states without enforceable mandates with Massachusetts, New Jersey, and the District of Columbia, which had enforceable mandates. The policy increased the probability of becoming newly uninsured by 0.56 percentage points (approximately 27 percent relative to the pre-reform mean), with a statistically significant increase among relatively healthy consumers but not among relatively sick consumers. The benchmark Marketplace premium for a 27-year-old increased by $739, while reported out-of-pocket premium spending declined by $284.60. Financial-incidence analysis suggests that accounting for ACA subsidies attenuates the financial burden that would otherwise fall more heavily on relatively sick consumers. These findings show that the incidence of adverse selection depends not only on Marketplace premiums but also on how public subsidies shape consumers' exposure to premium increases.
